

KANWAL M. UMER

AI Agentic Engineer | Full Stack Developer

Karachi, Pakistan | 03082363913 | lotusf980@gmail.com | github.com/lotusf980

PROFESSIONAL SUMMARY

Aspiring AI Agentic Engineer with a B.Com background and hands-on experience building modern AI and full-stack applications. Currently developing expertise in Agentic AI, AI Agents, RAG systems, Python, OpenAI Agents SDK, FastAPI, Next.js and TypeScript. Experienced with AI-assisted development and specification-driven workflows using tools such as Claude Code, Spec-Kit Plus and GitHub. Focused on building practical AI solutions for real-world business problems.

TECHNICAL SKILLS

AI & Agentic AI	Agentic AI • AI Agents • OpenAI Agents SDK • RAG • Prompt Engineering
Programming	Python • TypeScript • JavaScript • React • Next.js • FastAPI • Tailwind CSS
Databases	PostgreSQL • Neon • SQLModel • Qdrant Vector Database
Tools	Git • GitHub • Claude Code • Spec-Kit Plus • Docusaurus • Google Colab • VS Code

SELECTED PROJECTS

Physical AI & Humanoid Robotics — AI Learning Platform

Technologies: Docusaurus • MDX • OpenAI Agents SDK • FastAPI • Neon PostgreSQL • Qdrant

- Built a documentation and learning platform covering ROS 2, simulation, NVIDIA Isaac and Vision-Language-Action systems.
- Developed an AI-powered RAG chatbot concept for contextual and selected-text question answering.
- Designed the backend around FastAPI with vector retrieval using Qdrant and data storage using Neon PostgreSQL.

Evolution of Todo — Full-Stack Application

Technologies: Next.js • TypeScript • FastAPI • SQLModel • Neon PostgreSQL • Spec-Kit Plus

- Developed a modern task-management application using a specification-driven development workflow.
- Implemented a Next.js/TypeScript frontend and FastAPI backend with persistent PostgreSQL storage.

Personal Library Manager

Technologies: Python • Web Development • GitHub

- Developed a practical application for organizing and managing personal book collections.

Password Strength Meter

Technologies: Python • Streamlit

- Built an interactive application that evaluates password strength and provides user-friendly feedback.

Unit Converter

Technologies: Python • Streamlit

- Created an interactive multi-category unit conversion application.

Personal Portfolio

Technologies: Next.js • TypeScript • Tailwind CSS

- Created a responsive developer portfolio with project showcase, theme support and SEO/web metadata configuration.

EDUCATION

Bachelor of Commerce (B.Com) — University of Karachi, Karachi, Pakistan

CURRENT LEARNING & PROFESSIONAL DEVELOPMENT

Agentic AI & AI Agents • OpenAI Agents SDK • RAG • AI-assisted software development • Full-stack web development • FastAPI • Next.js • Specification-driven development • AI engineering workflows

LANGUAGES

Urdu: Fluent English: Reading and written proficiency

PROFESSIONAL INTERESTS

AI Agent Engineering • Agentic AI Applications • AI Automation • RAG & Knowledge-Based AI • AI-powered Business Solutions • Full-Stack AI Applications • AI SaaS Products
